ORDER FORM for *The Educational Software Selector (TESS)* on CD-ROM for Macintosh, DOS, & Windows Computers (Fall 1996)

NOTE: Only Texas educators may order *TESS* with this order form.

Texas has a state license for *TESS*, so the only cost to Texas educators is for the materials and services necessary for duplication and distribution. The price of $12.50 includes the CD-ROM and shipping and handling (anywhere in Texas).

The one CD-ROM runs on multiple platforms. In addition to a computer with a CD-ROM drive, the following is necessary:

- For DOS - 1 megabyte of available hard disk space and 1 megabyte of RAM.
- For Windows and Windows 95 - 1 megabyte of available hard disk space and 4 megabytes of RAM.
- For the Macintosh - 3 megabytes of available hard disk space and System 7 with at least 4 megabytes of RAM.

This version has the same search capabilities as the computer disk version. Districts may add their own software information into the computer database (location of the software, contact for additional information, and district comments on the software). This information is saved onto the computer.

The CD-ROM works on DOS, Windows, **and** Macintosh Computers.

$10 per CD-ROM

Plus $2.50 per CD-ROM for shipping/handling.

Contact EPIE Institute about volume purchases at 516-728-9100.

Please complete the information below:

Number of copies: _____   Amount enclosed: $_____

Name: _____   Title: _____

ORDER FORM for *The Latest & Best of TESS*
on Disks for Macintosh, DOS, & Windows Computers (Fall 1996)

NOTE: Only Texas educators may order *The Latest & Best of TESS* with this order form.

The Latest and Best of TESS, a subset of the full *TESS* database, identifies approximately 3,000 newly released or highly rated software packages. Texas has a state license for the *TESS* database, so the only cost to Texas educators is for the materials and services necessary for duplication and distribution. Texas educators may duplicate the computer databases and share them with other Texas educators.

The Latest and Best of TESS requires **20** megabytes of available hard disk space. Note: The full *TESS* database is 70 megabytes so it is available on CD-ROM for this update. If you need full *TESS* on computer disks, call ESC XIX (Pete Ortega) for pricing.

Hardware configuration:
- MS-DOS version - IBM /compatible computers running DOS 4.0 or later; at least 640K of RAM; 3.5" disk drive; color monitor; and printer (optional)
- Windows version - IBM/compatible computers running Windows 3.1 or later; 3.5" disk drive; color monitor; and printer (optional)
- Macintosh version - Macintosh SE or later computer (with a hard drive); 3.5" disk drive; color monitor (optional); and printer (optional)

The Latest and Best of TESS is available on high density disks. If you need it on low density disks, call ESC XIX for pricing.

Please complete the information below:

The Latest and Best of TESS Searchable Computer Database
